

Sterile Bio Plas G-Tube™

Premium Flat Top Microcentrifuge Tubes

0.6mL Sterile G-Tube®
Flat Top Microcentrifuge Tube,
Yellow, 4042S

1.5mL Sterile G-Tube® Flat
Top Microcentrifuge Tube,
Natural, 4030S

2.0mL Sterile G-Tube®
Flat Top Microcentrifuge Tube,
Orange, 4056S

The Sterile G-Tube™ Flat Top Microcentrifuge Tube is virtually transparent and far exceeds the toughness of any microcentrifuge tubes. When the Sterile G-Tube™ Flat Top Microcentrifuge Tube cap is closed there will be an audible "snap" that indicates a secure closure has been formed.

Made of tough, clear, proprietary formulated polypropylene, the 0.6mL, 1.5mL and 2.0mL

The Sterile G-Tube™ has the same chemical resistant quality as standard tubes, but they're sturdier and virtually transparent to give a better view. The flat top cap is easy to open and still provides a maximum secure seal.

The Sterile G-Tube™ is built for high impact usage and will withstand over 30,000 x g when spun. Thicker walls make this the tube of choice for extreme stress, high spinning speeds, autoclaving, boiling, chemical resistance and freezing. Will withstand temperature ranges of -80°C (-112°F) to 121 °C (250°F).
